About

© 2024 Hookkapaani | Page 2

Hookkapaani is a kinetic sculpture studio exploring the intersection of industrial materials, mechanical motion, and temporal transformation. Founded in 2019 in New Delhi, we create large-scale sculptures that move, breathe, and evolve with time.

Our work celebrates the honest beauty of raw materials - steel, copper, bronze, and iron. We believe that the marks of making: welds, joints, and assembly methods should be visible, not hidden. Each piece carries the history of its creation.

Philosophy

1. Honest Materials

We celebrate raw, unadorned industrial materials.

2. Visible Construction

The process of making is as important as the finished form.

3. Kinetic Intelligence

Motion is not decoration but inquiry.

4. Temporal Awareness

Art evolves through oxidation, wear, and environmental interaction.

5. Industrial Heritage

We honor manufacturing history and mechanical ingenuity.
